Safety Data Sheet (SDS)

SourcePeptides
info@sourcepeptides.co

Prepared in accordance with the GHS / OSHA Hazard Communication Standard (29 CFR 1910.1200) 16-section format.

Product: **SLU-PP-332 500MCG 60 Capsules** | SDS No.: SP-SDS-SP-SLU-CAP | Version: 1.0 | Issued: October 19, 2026

1. Identification

Product identifier	SLU-PP-332 500MCG 60 Capsules
Synonyms	Research compound in capsules (SLU-PP-332 500MCG 60 Capsules)
CAS number	303760-60-3
Recommended use	Laboratory and research use only
Restrictions on use	Not for human or veterinary use, food, drug, cosmetic, diagnostic, therapeutic, or clinical applications.
Supplier	SourcePeptides
Contact / Emergency	info@sourcepeptides.co

2. Hazard(s) identification

GHS classification: Not classified as a hazardous substance or mixture according to the GHS / OSHA HCS 2012 based on currently available information.

This material is a research compound that has not been fully characterized toxicologically. The absence of a classification does not imply the absence of hazard. Handle in accordance with good laboratory practice.

Signal word: None. Hazard pictograms: None assigned.

Precautionary statements: Keep capsules intact; if capsule contents are released, avoid formation and inhalation of dust. Wash hands and exposed skin thoroughly after handling. Wear protective gloves and eye protection. Keep out of reach of children and untrained persons.

3. Composition / information on ingredients

Chemical name	SLU-PP-332, supplied in hard-shell capsules, 60 per bottle, 500 mcg of active compound per capsule. Capsule shell and any inert excipients are not classified as hazardous; see the lot-specific Certificate of Analysis.
CAS number	303760-60-3
Molecular formula	C18H14N2O2
Molecular weight	290.32 g/mol
Amino acid sequence	Small molecule
Concentration / purity	≥99% (HPLC verified)

Reported molecular formula/weight may vary across sources and salt forms; confirm against the lot-specific Certificate of Analysis.

4. First-aid measures

Inhalation: Move person to fresh air. If breathing is difficult, seek medical attention.

Skin contact: Wash with soap and plenty of water. If irritation develops or persists, seek medical advice.

Eye contact: Rinse cautiously with water for several minutes; remove contact lenses if present and easy to do. Continue rinsing. Seek medical attention if irritation persists.

Ingestion: Do not induce vomiting. Rinse mouth with water. Seek medical attention. Show this SDS to medical personnel.

Most important symptoms/effects: No specific symptoms known; effects of overexposure have not been characterized.

5. Fire-fighting measures

Suitable extinguishing media: Water spray, carbon dioxide (CO2), dry chemical powder, or alcohol-resistant foam.
Specific hazards: Combustion may produce carbon oxides (CO, CO2) and nitrogen oxides (NOx).
Protective equipment for firefighters: Self-contained breathing apparatus and full protective clothing.

6. Accidental release measures

Personal precautions: Collect intact capsules. If capsule contents are released, avoid dust formation and inhalation and wear appropriate PPE (Section 8).
Methods for cleanup: Collect released powder by methods that minimize dust (e.g., dampen, sweep, or vacuum with HEPA) and place it, with any damaged capsules, in a suitable closed container for disposal (Section 13). Avoid release to drains or the environment.

7. Handling and storage

Handling: Use only in a properly equipped laboratory by trained personnel. Keep capsules intact; avoid generating dust from capsule contents. Do not eat, drink, or smoke when handling. Wash thoroughly after use.
Storage: Store tightly sealed in a cool, dry place at room temperature, protected from light and moisture. Keep the bottle closed when not in use.

8. Exposure controls / personal protection

Occupational exposure limits: None established (OSHA PEL / ACGIH TLV not assigned).
Engineering controls: Use with adequate ventilation; a fume hood or local exhaust is recommended when handling powder.
Personal protective equipment: Nitrile gloves, safety glasses or goggles, laboratory coat. A respirator is not normally required for intact capsules; use a NIOSH-approved dust mask/respirator where capsule contents may generate dust.

9. Physical and chemical properties

Physical state	Solid (powder-filled hard-shell capsules)
Appearance	Hard-shell capsules containing a white to off-white powder
Odor	Odorless
Solubility	Active compound: Soluble in DMSO (~58 mg/mL, ~199.8 mM) and sparingly in ethanol (~2 mg/mL); insoluble/practically insoluble in water. NOTE: this is a small molecule, NOT a peptide — it is NOT reconstituted in bacteriostatic/sterile water; a DMSO stock (with dilution) is the standard research vehicle. The capsule shell dissolves in water.
Molecular weight	290.32 g/mol
pH / melting / boiling / flash point	Not determined

10. Stability and reactivity

Stability: Stable under recommended storage conditions.
Conditions to avoid: Heat, light, moisture, and repeated freeze-thaw cycles.
Incompatible materials: Strong oxidizing agents.
Hazardous decomposition products: Carbon oxides (CO, CO2) and nitrogen oxides (NOx).
Possibility of hazardous reactions: None known under normal conditions of use.

11. Toxicological information

No specific toxicological data are available for this product. Acute toxicity, skin/eye irritation, sensitization, carcinogenicity, mutagenicity, and reproductive toxicity have not been established. Routes of exposure: inhalation, skin contact, eye contact, ingestion. Treat as a substance of unknown toxicity and handle accordingly.

12. Ecological information

No ecological data (toxicity, persistence, bioaccumulation, mobility) are available. Avoid release to the environment.

13. Disposal considerations

Dispose of contents and container in accordance with all applicable local, state, and federal regulations. Do not discharge into drains or watercourses.

14. Transport information

Not classified as a dangerous good for transport under US DOT, IATA, or IMDG regulations. Not regulated. UN number: none.

15. Regulatory information

Sold strictly for laboratory and research use only. This product is not a drug and is not approved for human or veterinary use. Not listed as a controlled substance under the US Controlled Substances Act. TSCA: intended for research and development use. Users are responsible for compliance with all applicable regulations.

16. Other information

SDS version: 1.0 Issue date: October 19, 2026 Prepared by: SourcePeptides.

Disclaimer: The information herein is provided in good faith and believed to be accurate as of the issue date, but no warranty, express or implied, is made. This SDS is a guide for safe handling under controlled laboratory conditions and does not constitute a guarantee of any specific property. Because the toxicological profile of this research compound is not fully characterized, it should be handled by qualified personnel using standard precautions.
